

6516208681.txt

I have been an XM Satellite Radio subscriber for over a year. I LOVE it!! The fact that the NAB has gotten their feathers ruffled because they think they are having something taken from them is a crock. I pay for this service, and I love what I get for my money. Perhaps they should step up, and provide better service, rather than spend their time pointing fingers and screaming poor me. I love the fact that I can get traffic and weather reports at any given time. I can not begin to tell you how much safer I feel when traveling alone knowing I can gain access to these report on the spur of the moment. I ask that you give great consideration to the NAB's petition 04-160, and reject it.
Sincerely,
R. Barnes
